SUMMARY

Results-driven professional with a diverse background in construction and business operations, transitioning to a career in web development. Possesses exceptional team leadership and mentoring skills, along with a proven track record in project management and effective communication. Demonstrates adaptability, coachability, and a quick learning ability, driven by a passion for growth and delivering tangible results.

Now seeking a web development role, I am excited to utilize my diverse range of skills, including team leadership, mentoring, project management, and effective communication, to make a meaningful impact. With a focus on continual learning and development, I am committed to staying updated with the latest web development trends and technologies, ensuring that I can contribute to the growth and success of a forward-thinking company.

If you are interested in discussing how my qualifications and experience align with your organization's needs, I would welcome the opportunity to connect and explore potential opportunities further. Please feel free to reach out to me at your convenience.

EXPERIENCE

Client Manager Restoration 1

January 2015 – December 2016, US, SC, Clover

- Responsibilities include but are not limited to team leading, job sales, assisting with initiating insurance claims, building insurance and assessment packets, implementing a plan of action for fire/water damage, mold remediation, and storm damage restoration while working without direct supervision.
- Secured and managed client base of 120 customer relationships through active monitoring and outreach, implemented tailored insurance claims plans to increase customer satisfaction by 80%, and drastically reduced client turnover by 40%.

Correctional Officer Alexander Correctional Institution

January 2015 – December 2015, US, NC, Taylorsville

- Maintained the security and control of the facility, supervised and directed activities for 296 inmates while maintaining 100% accountability at all times, monitored and operated security controls, equipment, and computers. Resourceful and dedicated officer with motivational leadership.
- Monitored inmate activities, established and enforced facility rules and regulations in accordance with current legislation, and conducted searches of inmates, staff, and visitors to detect contraband materials, ensuring safety and security of the facility and all occupants. Resolved disputes quickly and efficiently to avoid potential safety risks. Achieved 100% accountability for inmates at all times.

Cell Tower Foreman Modern Tower Solutions

January 2013 – December 2015, US, NC, Charlotte

- Managed day-to-day activities and safety of tower hand crew, responsible for reading blue prints, building estimates, installing coax and fiber optics lines, junction boxes, and radio.
- antennas on tower.
- Supervised 7 tower hands in the installation of equipment on over 150 cell towers, reduced construction costs by 10% in the first quarter, and achieved the completion of projects on time or ahead of schedule 95% of the time.
- Comprehensively inspected and evaluated all equipment installation to ensure timely completion within safety and quality standards.
- Managed site access and set-up processes to ensure safe and timely commission of new sites.

CH-53E Airframes Mechanic United States Marine Corps

January 2009 – December 2013, US, NC, Jacksonville

- Performed maintenance on aircraft structural, hydraulic, and pneumatic system components.
- Troubleshooting hydraulic and pneumatics systems through schematic system diagrams while understanding of system operations. Trained coworkers on publications, support equipment, maintenance, composite repair and metal working, flight line safety programs for the CH53-E.
- Reduced AOG time due to maintenance issues by 45%, decreased labor costs by 23% and increased parts inventory accuracy by 92%.

PROJECTS

API Playground

UNC • May 2023 – May 2023

- API Playground is a learning tool created in a sandbox style where novice and beginner web developers can learn about and test APIs safely in the browser window.

Calorie Tracking application

UNCC • March 2023 – March 2023

· Developed a calorie tracker application as part of a team that allows users to easily input their meals and quantities to track their macros and calorie intake. The user-friendly interface provides a convenient way for users to monitor their daily food intake and make informed decisions about their diet.

CERTIFICATIONS

Full Stack Web Development

UNCC · 2023

Completed a Full Stack Web Development certificate from UNC Charlotte in 2023, gaining proficiency in the theory and application of web development. Developed a professional portfolio showcasing my ability to build and implement dynamic end-to-end web applications. Participated in hands-on learning activities with employers and received one-on-one career coaching
